Electric Multidirectional Sideloader in three-wheel-model

The three-wheel Multidirectional Sideloaders are the cost effective entry-level-variant for the transport of long goods. They are suitable for both indoor and outdoor use.
Universal…

Four-way sideloader with diesel or gas drive

The compact four-way sideloaders with powerful diesel or gas drives are designed for outdoor use. Their hydrostatic all-wheel drive means they can also be used on semisolid ground.
Efficient…

Order picking systems

Electric multidirectional order picker

The models MU-OP and MU-SO are perfectly suited for the order picking of profiles and light long loads in narrow aisles. At the same time, these trucks can be used as conventional Electric Multidirectional Sideloaders.

Electric two-side order picking platform

The ranges enables the quick order picking of sheet materials and profiles directly from either side of the rack aisle.

Electric Multidirectional Sideloader with removable order picking platform

The model KP can be used as a conventional Electric Multidirectional Sideloader for the warehousing of complete packs and for the order picking of individual customer orders with the platform being installed.

Electric Multidirectional Sideloader with vacuum suction device

Multidirectional Sideloaders as well as order picking platforms can be complemented by a vacuum suction device. As a result, large volume sheet materials can be picked semiautomatically by an operator.
Strong & Heavy ...

Heavy duty transport vehicles

- **Tool Changer**
  HUBTEX tool changers help to reduce the changing times for pressing and stamping tools and also for injection moulding tools.

- **Platform and rail-mounted trucks**
  The Platform truck is a manoeuvrable, self-propelled vehicle for the in-plant transport of a variety of heavy loads. The rail-mounted truck is a track-bound vehicle. Both vehicles are made to individual customer specifications.

- **Heavy-duty compact front-lifts**
  HUBTEX Compact front-lifts can be used anywhere where heavy loads have to be transported in narrow spaces. There is a special version for foundries which rounds off the range of products.
Special purpose vehicles

Electric towing tractor
The main area of application for the electric-tractor-head with gooseneck is material loading in production areas with the help of cargo trailer systems.

Glass Handling Systems
Customers from the glass industry throughout the world use HUBTEX vehicles for the handling of flat glass. The vehicles transport whole racks, glass packages or separate plates and are known for their superior reliability.

Container Transporter
HUBTEX produces individual transport vehicles for the in-plant handling of containers. These are available with capacities up to 25 t. They can be equipped with an electric drive or a diesel and gas drive, depending on the requirements.

Drum transporter
Loads up to 50 tonnes can be transported safely and quickly using the HUBTEX drum transporter. The wide range of lifting types provide a suitable solution for every warehouse concept.
Compact Reach Truck

HUBTEX reach trucks feature a combination of compact design and high load capacities. The SQ offers considerably higher load capacities at the same dimensions as conventional reach trucks.
HUBTEX Maschinenbau GmbH & Co. KG

STANDS FOR RELIABILITY, PRECISION AND INNOVATIVENESS

With its huge range of products and its modular construction system, the company can facilitate even the most individual solutions. HUBTEX has 60 offices worldwide and over 60 contractual partners.
